## About Me

A programmer looking forward to working with people and learning new technologies to create products that will help people.

## Education

### BSc. in Computer Science

BRAC University

January 2019 - May 2022

CGPA: 3.92 / 4.00

### A Levels (CIE)

Sunnydale School

3 As

### O Levels (CIE)

Sunnydale School

4 A\*s, 3 As

## Soft Skills

- Organized
- Punctual
- Communicative
- Team Player

## Experience

### BACKEND ENGINEER

at **Airwrk**

August 2022 - Present

- Designed and implemented the core REST API in Node.js & ExpressJS
- Transitioned proof-of-concept to production-level applications
- Documented endpoints following the OpenAPI specification utilizing Swagger libraries
- Implemented SMS and email verification for user accounts incorporating secure generation, storage and brute force protection
- Designed and wrote thorough unit and integration tests for API endpoints
- Integrated OpenAI API features to auto-generate description bodies using AI

### STUDENT TUTOR

at **BRAC University**

June 2021 - January 2022

- Worked as a student tutor of CS at BRAC University for Summer and Fall of 2021 to assist over 60 students with their coursework
- Graded course assignments submitted by students

### PROGRAMMING CONTEST

at **BRAC University**

October 2019

- Secured the 1st runner up position at BRACU Intra University Programming Contest (Fall 2019) as a team of 3 to solve programming problems

## Projects

### mongoose-footprints

Author and maintainer of this NPM package, which is a plugin for the library 'mongoose' that logs and tracks changes made to documents in MongoDB by utilizing middleware over CRUD operations to facilitate the creation of audit logs.

### Tamashi

A Discord bot that can follow what a user is listening to on their Spotify and play it back in a voice channel for everyone to tune in and listen along live. It also supports playing songs manually using URLs/titles from YouTube, Spotify, Deezer, Apple Music.

### Anitrack

Website to view information about different anime retrieved from a third party REST API and add them to a watch list. Includes a caching system that stores responses in a Redis server to prevent repeated API calls.

## Skills

### Programming Languages

Java, Python, JavaScript/Node.js, TypeScript, HTML/CSS

### Frameworks

Django, Express, jQuery, Bootstrap, Jest, Maven, JavaFX, Mongoose.js, Discord.js

### Tools

Git, Linux OS, Docker, MySQL/MariaDB, MongoDB, Redis
